

Getting Started Checklist

Follow these steps to begin connecting with your students on Along.

☐ Create your account on along.org.

☐ Introduce Along to students.

Use [this customizable slide deck](#) to help you get off to a strong start with your students.

☐ Roster your students.

You can read more about rostering via class codes [here](#).

☐ Share your first question with students.

Select a question from [Along's Library](#) and send it to your students.

☐ Review and consider students' responses.

See how individual students respond as well as your class as a whole.

Let students know you heard them. This is the most important part!

Reply to students, as a class and/or individually. Consider ways, big or small, to show them their voices matter.

Visit our [Help Center](#) for answers to any questions along the way. You can also email us at support@along.org.
